one time was 10 points up from Wednesday's closing price, and General hands with a net gain of 3% points. Steel common closed at 10814, up 1.

Steel common closed at 108%, up 1.

There was no news during the day of great importance. Even the report from Holland that the Crown Prince was still interned there had no effect, because, though the previous story of his escape had been generally credited nothing more than "human interest" importance had been attached to it. Most remarkable, however, was the renewal of call leans at 5 and 5½ per cent, following the 9 and 9½ per cent renewal rates of Thursday. At the close of the day the rate had even fallen to 4%. This was not only gratidication that the banks had completed higher

Recovery Complete

stocks up to 108.80. This is above the Call money: closing price of 108.60 on Monday June 2, just before the first break. I is not a new high level for the year however, as the average reached 108.93 at the end of the first week. Yester day's price, however, indicates a com plete recovery.

Montreal Exchange

New York funds at Montreal reached a new high premium yesterday at 1-32

Bank Acceptances.—Rates were unchanged yesterday as follows: The Bank of Montreal sent here \$12,000,000 in gold, but this was said to be a "special transaction" unconnected with exchange.

B. & O. Financing

The cost to the Baltimore & Ohio Eligible Railroad of the recent borrowing of \$35,000,000 is understood to have been between 6% and 6% per cent. The stock declined a further 2% points yesterday, and 28,600 shares were sold.

The Gold Paradox

We are sending gold to all the countries to which we owe it. As a general thing we have bought more goods from those countries than we have sold to them, and as the government no longer forbids it, we are shipping gold to make up the difference. But the countries that might be sending gold to us to pay their debts here refuse to send it. This might create a serious condition were it not that we already have more gold in this country than we know what to do with and can gladly spare it. For to do with and can gladly spare it. For the first five months of the present year \$1.08%; Mexican dollars, 83% @87%. the outside world has gone into our debt to a net amount of \$1,818,000,000.

That would be about the amount of gold we would have received in those five months if all the gold markets of the world were free. As a fact, the net amount of gold received to the second received received to the second received r

that we owe India a balance. Below is appended a table from Dow, Jones & Co. of the approximate present value of the dollar in various countries: England\$1.055

The Markets

Stock Movement and Money

Trading in stocks was resumed at a million-share pace yesterday. The advances reached several points in a number of issues. American Woolen gained 7 points. Chandler Motor in 1919 would earn a balance for dividends of \$40 per share. Chandler Motor is rather individualized among the motor shares by reason of the exceedingly simple nature of its capital structure. The company has no bonds, no preferred and only 70,000 shares of stock.

Under these conditions and facing the promise of another big year in 1920 it would not be surprising if later on stockholders received extra even above the regular 16 per cent dividend.

Hayden, Stone & Co.

Crystallization

Wednesday's closing price, and General Motors 5, but half of these gains were lost. Republic Iron and Steel was notably active, 23,600 shares changing hands with a net gain of 3½ points.

As soon as the plan to finance Europe takes tangible form and some good business looms in sight we are likely to see a crystallization of bullish sentiment.—E. W. Wagner & Co.

Chandler Motor

Chandler Motor

The earning results of Chandler Motor Company in its December 31, 1919, fiscal year promise to exceed any former year in the company's history, even the high record year 1917, when the balance for the 70,000 shares of stock reached a total of \$2,382,403, equal to \$4.03 per cent.

At present it looks very much as if Approved Of by Stockholders

Canada Will Get \$75,000,000 Loan To Pay Off Notes

Condition of Money Market Will Necessitate Payment of Higher Rate of Interest Than in 1917, Is Belief

Negotiations are on between a powerful New York banking group and financial representatives of the Canadian government looking to the flota

Company.

Details Now Discussed

Conferences between the bankers and the representatives of the Dominion government are said to have reached a point where the important details of interest rate and maturity are being considered. Bankers said yesterday that definite plans with regard to the exact form the loan will take would probably be reached by next week.

Agreements With Millers and Dealers Will Be Executed

With a total of \$1,150,000,000 at its disposal for financing the purchase and carrying of wheat purchased from the farmer under the government guarantee, the United States Grain Corporation, which is handling the crop again this year, is not expected to call upon the banks for any large loans to help carry the crop. Last year the corporation borrowed several hundred millions of dollars on acceptances during the season in order to carry the wheat until it would be liquidated.

A letter sent out by Julius H. Barnes,

The Guaranty Trust Company, of New York, and Kidder, Peabody & Co. have sold the block of \$2,900,900 New York Central Rallroad Company 6 per cent convertible debenture bonds, duc, 1933, recently offered.

Gold From the Enemy!

German and Bulgarian gold has been turned over to the United States authorities for American wheat and flour shipped into those countries by the United States Grain Corporation under the agreement reached early in the year.

Both countries had the alternative of paying in gold or in goods, but they found it impossible to ship goods, owing to the blockade rea substantial amount of gold was shipped to Brussels, Belgium, and deposited there to the account of the Federal Reserve Bank of New York. In the case of Bulgaria the gold paid the grain corporation for wheat and flour was deposited by the Bulgarians on a United States battleship in the harbor of Constantinople. Since, however, Bulgaria has shipped goods to the United States, which are being sold in order to make possible the return to Bulgaria of the gold deposited.

Railroad Committee Discusses Car Trust Plan

Document Sent to Individual Roads for Their Approval

Roads for Their Approval years being considered. Bankers said yesterday that definite plans with regard to the exact form the loan will take would probably be reached by next week.

The New York bankers would asy nothing yesterday relative to the rate or maturity of the proposed new issue, but it is believed the interest the Dominion will have to pay of the borrowed money will be at a higher rate than was paid when the \$100,000,000 loan was floated in 1917 bearing an interest rate of 5 per cent. That loan was sold to American investors at 95 and interest to yield an income return of about 6.07 per cent. Changed conditions in the capital market, it is stated, will probably compel the charging of a higher interest rate than in 1917. It is expected also that the new loan will run for a longer period.
The visit of J. P. Morgan & Co., to Ottawa about a fortnight ago is understood to have been in connection with the new Canadian loan.

Outside of Davison Plan It was pointed out yesterday by Wall Street bankers that any loan that may be made to Canada will fall cutside of the so-called "Davison" plan for afterwar finance, since the international programme of reconstruction finance under consideration by the endired are in the new Canadian loan.

British Bankers Not Supported in Loan to China

London Reports' Government Upholds Japan's Protest Against Belgium's Participation in Group

New York Tribune Special Correspondence LONDON, June 27.—The international banking group which has under consideration a loan of \$100,000,000 to China has struck a snag here in the refusal of the British government to give the support desired by the bankers. Japan has also protested against the terms by which it is planned to admit Belgium into the consortium. Both the British and American bankers are in thorough agreement, but the former government, which sides with Japan, has thus far failed to uphold its own Several conferences have been held on the matter during the

Under the terms of the tentative agreement drawn up at the Paris peace conference by the four-power group, consisting of Great Britain, France, Japan and the United States, China is to obtain an aggregate of \$100,000,000 from a series of loans to be floated in the allied countries.

While the details remain to be worked out it is understood that the programme provides for at least four separate loans of \$25,000,000 each, to be negotiated from time to time are the funds are needed by China. The terms, including the rate of interest to be charged the Chinese government, are to be determined at banking conferences of the allied groups after the peace treaties have been signed.

A country-wide syndicate of more

A country-wide syndicate of more than thirty American banks will handle the portion of the Chinese loans to be allotted to the banking group in this country. It is believed that the bulk of the money loaned to China will be obtained here.

John J. Abbott, of the Continental and Commercial Trust and Savings Bank of Chicago, recently returned to this country from China, where he made an investigation of the finances of that country with the view of reporting the results of his findings to the American bankers. The nature of his report has not yet been disclosed.
